## THE STANDARD COLLECTION

---

Coolicon Lighting Limited is a brand steeped in 90 years of rich British product history.

Our roots lie in lighting innovation with a speciality in cooling light bulbs and even light distribution for efficiently lighting above and below.

We are leaders of Vitreous Enamel lighting products, handcrafted to last a lifetime, building on the benchmark set by our Coolicon® forefathers. We pair fine materials with the honed skills of today's craftspeople to produce exemplary lighting products to use and love every day.

The Original 1933™ Design lampshade in Vitreous Enamel is a handcrafted legacy, true to the patent, perfectly meeting the lighting requirements of today.

*An icon in its own right.*

The introduction of the Large 1933™ Design utilises the ambient light, to transition the shade from utility task light to contemporary interior lighting.

*The Standard Collection* ensures this timeless lampshade will be at home in any room.

## THE CLASSIC PALETTE

The *Classic Palette* is made up of six colours dating back from the 1930s, 1940s and 1950s.

Quintessentially British enamel colours, this palette was built from historical influences; Original Green, a classic racing colour, Original Grey, from garages and automotive workshops, and Original White, from the corridors and wards of hospitals.

Colour Name	Original 1933™ Design	EUR	Large 1933™ Design	EUR
 Jet Black	CL01-BLK	€ 310.00*	CL02-BLK	€ 440.00+

 Original White	CL01-WHT	€ 310.00*	CL02-WHT	€ 440.00+

# Smon Bcn COOLICON

## THE CONTEMPORARY PALETTE

Our *Contemporary Palette* is made up of six vibrant modern colours. Traditionally very challenging to produce, these enamel colours are often only used in small areas such as on jewellery. The *Contemporary Palette* brings the classic utility lampshade up-to-date in refreshing interior accent colours. These colours further reveal the expressed edges and Maker's Marks, bringing them to the aesthetic forefront.

Colour Name	Original 1933™ Design	EUR	Large 1933™ Design	EUR

## THE UNDERGROUND COLLECTION

---

Sharing a rich heritage story, the Coolicon® shade was first designed in London and released in 1933, as was the original London Underground map designed by Harry Beck. Proving to be an icon-generating year in the British capital, 1933 saw Frank Pick initiate a coherent design approach to London's public transport system which Coolicon® seamlessly fitted into. This began to shape the city landscape with the modernist stations by Charles Holden and Stanley Heaps, all while Coolicon® shades lit the workshops and back rooms that kept the stations and network running.

Harry Beck created the famous London Underground map as we know it today. As a technical draughtsman working at the London Underground Signals Office, Beck used his experience to map the complex tube route in the same colour coordinated format found in electrical circuit diagram to propose a radical solution that was lauded on its release in 1933.

Owing to the historic relationship with the London Underground, the Coolicon® shade is the only product in the world to bear the original map as Beck drew it.

## THE UNDERGROUND COLLECTION

Consisting of four colours selected from our Classic Palette; Northern Line Black, Piccadilly Line Blue and District Line Green are reminiscent of the routes printed on the London Underground map, Paper Cream shares a likeness to the colour of the old paper map. Our only shade to feature the map on top of the reflector, the Underground Map lampshade is sure to be the focus of any space.

## THE CRAFTSMANS™ COLLECTION

---

The shade that once lit England's world renowned Potteries of Stoke-on-Trent is now handmade in these very Potteries.

Through our Craftsmans™ Collection we celebrate the long history of fine British ceramics that has been refined over generations.

The Craftsmans™ Collection marries classic materials, traditional skills and processes with timeless design to create a new refined aesthetic.

Moving slightly away from the utility roots this new range brings a refined aesthetic to both the shade and quality of light.

Fired three times, our lampshades progress through the production process under the watchful eye of the master craftsman and this family team.

Incorporating finer detail and finishes this collection brings a new level of sophistication.

# Smon Bcn COOLICON

## SILHOUETTE™

The Silhouette™ is the only shade in the Coolicon Lighting collection not to feature the trademark opening in the gallery.

This very special shade instead utilises the translucent properties of Fine Bone China. When illuminated the differing thickness of the top gallery glows to subtly pay homage to the trademark shape.

Colour Name	Model	EUR
Silhouette	CL04-GLS	€ 350.00*

\*Includes SK01-E14-BRS, E14 Signature Brass & Enamel Suspension Set  
For Industrial & Enamel Suspension Set pairing, deduct €15

## COOLICON® ACCESSORIES

---

At Coolicon Lighting, we are one of the only producers of Vitreous Enamel ceiling cups in the world. As such, we create these usually overlooked items with as much skill, technique and expertise as we do our iconic lampshades.

Our Vitreous Enamel Ceiling cups mirror the shape of the Coolicon® lampshades gallery vent for a seamless connection between ceiling and shade. The depth of this design allows plenty space to store excess cord should you wish to shorten the suspension length.

Our pendant lampshades are beautiful indeed, but to really make them shine, hang them low or to your liking with one of our thoughtfully curated Suspension Sets. Available with two different lamp holders, Coolicon® suspension sets reflect our illustrious heritage and authentic product offering through choice of materials.

All of our Suspension Sets are paired with a black fabric over braided suspension cable and our classic hand-enamelled ceiling cup.

## **Secto Design** colabora con Signify para proporcionar bombillas regulables en calidez

La iluminación puede crear o destruir el ambiente de un espacio. Ya sea que prefieras un brillo cálido y acogedor o una luz brillante y fría, el tono ideal depende del contexto y de las preferencias personales. Ahora, gracias a una innovación revolucionaria de Signify, el líder mundial en soluciones de iluminación, existe una nueva forma de personalizar la iluminación. A partir de este otoño, incorporaremos esta innovación a nuestras luminarias icónicas, como la primera empresa de diseño de iluminación del mundo.

Imagina cambiar sin esfuerzo entre cinco temperaturas de color diferentes, todo con un simple toque de un interruptor en la base de la bombilla. Ahora es posible con la nueva bombilla LED Philips CorePro que te permite elegir entre cinco opciones diferentes: 2700, 3000, 4000, 5000 y 6500 Kelvin, que ofrecen desde tonos cálidos y dorados hasta tonos nítidos de luz diurna.

La temperatura del color se puede ajustar con un interruptor en la base de la bombilla antes de instalarla en la pantalla. Este desarrollo no se trata solo de un avance tecnológico, se trata de crear la atmósfera perfecta para cada espacio. Las luminarias arquitectónicas diseñadas para Secto Design por Seppo Koho son conocidas por sus líneas limpias y su elegante simplicidad, lo que las convierte en una opción versátil para interiores públicos y privados en todo el mundo. Sin embargo, los requisitos de temperatura del color pueden variar mucho según el tipo de espacio e incluso las preferencias culturales. Con la nueva característica de las bombillas Philips desarrolladas por Signify, las posibilidades de decoración de interiores se han ampliado. Ahora, nuestros clientes pueden ajustar fácilmente la iluminación de sus hogares, oficinas o espacios públicos para adaptarla a sus necesidades y gustos, sin instalar sistemas complicados. Es un gran paso adelante en el diseño de iluminación que complementa perfectamente nuestro compromiso con la innovación, la calidad y la estética. Los clientes de Secto Design siempre reciben un LED incorporado o una bombilla adecuada al comprar nuestras luminarias. Como se exportan a casi 90 países en todo el mundo, encontrar un socio de iluminación confiable que pudiera cumplir con nuestros altos

estándares y alcance global ha sido crucial para nosotros. En Signify, más conocida por su marca Philips, encontramos un socio internacional para nuestro mercado global.

Al combinar nuestras luminarias artesanales con la última tecnología de iluminación ajustable, podemos ofrecer una experiencia única a nuestros clientes. Las nuevas bombillas Philips (E27, 8 W, 806 lm, regulables) se entregan con la mayoría de los modelos con casquillo E27 de Secto Design a los mercados de destino con el sistema eléctrico de 220-240.

Kenneth Grönholm, director ejecutivo de Signify Market Nordics, compartió su entusiasmo: “Esta colaboración es solo el comienzo y ya estamos planeando nuevas aventuras juntos”. Tuula Jusélius, fundadora de Secto Design, se hizo eco de su entusiasmo: “Es fantástico que el fabricante de iluminación líder mundial haya querido cooperar con una empresa de diseño finlandesa. Juntos, podemos ayudar a nuestros clientes a crear el ambiente perfecto en su interior”.
